

# DESERT RIDGE

TRANSITIONAL CARE CENTER

**FOCUSED ON YOUR  
WELLNESS AND HEALING**

Our residents and patients will be served by staff trained to meet the unique and specialized needs of each individual.

State of the art technology has been interlaced throughout the facility. Mobile resident charting allows clinicians to capture data right at the bedside. This real-time tracking greatly improves accuracy, decreases errors, and streamlines the entire care process. Physicians can access patient information from any location on a moment's notice. This technology allows clinicians substantially less time with administrative paperwork and more time with patients and families.

## SHORT-TERM REHAB

Designed specifically for "patient-centered" care, our short-term rehabilitation facility provides an extensive range of rehabilitative services and 24-hour skilled nursing care. After a stay in the hospital patients may only require short-term rehabilitation or short-term skilled nursing care. The goal is to return home or to a residential care environment. We are dedicated to providing a "culture of rehabilitation" for patients to maximize improvement of health and wellness.

## SKILLED NURSING / LONG-TERM CARE

Our center provides 24-hour staffing and other comprehensive services to those requiring a greater level of care than that offered by assisted living facilities. All Skilled Nursing Care centers require the professional skills of a registered nurse (RN) or licensed vocational nurse (LVN). With 24-hour nursing care and many of the comforts of home, we seek to balance quality care and quality of life. Promoting autonomy and choice, we will offer a variety of services, social activities, and recreational opportunities.

## SERVICES
